

# ZIRKULARDYNAMIK

Zirkulardynamik is a bunch of at least 10 people with completely different musical backgrounds. The project was never planned and in the early stages there was no real target, except experimenting with sounds together and having fun. It grew from friendship and curiosity for what is possible in combining different instruments and sound-equipment in a non-conventional way. In the beginning there were only three people, notably dan, alex and johannes, who were fascinated by the noisy sounds originating from feedbacks. Over the years other instruments like guitar, keyboard and didgeridoo came along and the people who played these made up the style of Zirkulardynamik. The actual cast includes Dan, who controls the feedbacks and is the main vocalist, Alex, who is the rhythm programmer and lately contributed to the singing, Johannes, who plays the bassguitar, Basi and Tom on the guitar, Cord on the keyboards and finally Inkoe, who adds the scratches and some effects. Firas creates the visual part with his for the rest of us cryptic equipment and Lennert does the dirty mixing job on our live gigs - by the way, he's cool as well. Last, but not least, Henne, who is into all the organizing, booking and web stuff, basically the slut for everything.
